Make your own recycling guidelines

Using art supplies you have at home (eg. scrap paper, construction paper, poster board markers, crayons) make your own recycling guideline posters to put on your refrigerator or above your recycle bin. Get creative and tape on objects, like a soda can to your poster to show the actual item to be recycled.

Step One
Find your local recycling guidelines to see what is recyclable in your community. You can check out your recycling hauler’s website or call them to get guidelines.

Step Two
Decide where to post your guidelines. Can you hang it in the kitchen or near your recycle bin?

Step Three
Gather your materials, like posterboard or cardboard, construction paper, markers, glue, tape, etc. If you’d like to make your poster 3-dimensional, you could tape or glue lightweight materials like aluminum cans, cartons, paper, etc. to your recycling guidelines poster!

Step Four
Create your poster and post it in your home!

See examples below!
